

CASE STUDY: EVENT SECURITY

In 2012 Tribal Security acquired an event contract. The event complex was having issues with renters over serving alcohol, fighting inside and outside the building, damaging the property and not locking the building after the event. They were also having issues in their parking lot with vehicle break ins and renters holding the event complex liable.

We provided them with Event Security Officers on site for every event the complex would have. Mosaic, Birthdays, Weddings, Anniversaries, Concerts and Dances.

In the next few months:

- Our Event Security enforced SLGA procedures and regulations when it comes to over serving alcohol, serving to minors and serving cut off times.
- Having Event Security on site quickly handled any fights occurring inside and outside the event complex.
- Our Event Security eliminated any liability issues by eliminating vandalism or vehicle break ins by providing a routine exterior check of the complex.
- Our Event Security do a walk thru of the event complex to ensure all patrons have left the building, we lock and secure all doors and arm the alarm system upon exit of the event complex.

The Event Complex is so happy with our service that we continue to provide Event Security for them to this day.
